Speeding in Riverstone

As many of you are aware, speeding is a constant concern within the community. Riverstone is still developing which means more streets, more residents and of course, more vehicles. Please take care to adhere to the speed limit signs that are posted throughout the entire community. The safe speed for each neighborhood is 30-35 MPH and the main thoroughfares are 35-45 MPH. These speed limits are not suggestions; they are the speeds the county deemed appropriate for those particular sections.

There are officers who are contracted by the MUD district to patrol within Riverstone. These officers will be keeping an eye out for anyone speeding throughout the community. While the officers are the necessary authority figures, we can each do our part in making the roadways in Riverstone more secure for our families by paying attention to speed limit postings and simply obeying the law. Thank you for doing your part and for all of your support!

Your FirstService management team strives to provide the best possible service. If you have any questions or concerns, please contact us at 713.332.4750, or you can visit our office at The Club at Riverstone, 18353 University Blvd., Sugar Land, TX 77479. We thank you in advance for your support!

Fort Bend County Fair

Sept 23–Oct 2

Fort Bend County Fairgrounds, Rosenberg, TX

Through the years, the Fort Bend County Fair has grown into one of the largest and most successful fairs in the State. Residents of the county eagerly anticipate visiting with friends and neighbors at some of the many activities the Fair has to offer.

The first Fort Bend County Fair was held October 6–8, 1933. The original Fairground was located between Rich-

mond and Rosenberg, on the property now occupied by Fiesta on Avenue H. In 1974, the Fairground was moved to the existing location on State Highway 36 just south of U.S. Highway 59 in Rosenberg.

The youth of Fort Bend County have been the driving force of this organization for over 75 years. Youth education has always been a primary focus of fair activities. The development of a scholarship program in 1979 has provided deserving Fort Bend County students with scholarships to Texas colleges and universities. To date, over 600 scholarships have been awarded to deserving students.

Flood Protection in Riverstone

As you may be aware, residents in Riverstone are served by one of two levee improvement districts—Fort Bend County Levee Improvement District No. 15 (“LID 15”) and Fort Bend County Levee Improvement District No. 19 (“LID 19”). Both LID 15 and LID 19 are charged with operating and maintaining the flood protection and drainage facilities that serve Riverstone. These facilities include the entire earthen levee system, pump stations, gates, detention ponds, and outfalls within Riverstone.

Over the past year and a half, the Brazos River has experienced unprecedented flooding. Most recently, weather events in April and May of this year led to record-breaking river elevations for the Brazos River. According to

the National Weather Service’s gauge at Richmond, during the May flood event, the river elevation reached 54.74 feet, shattering the prior record of 50.30 feet set in 1994.

Within Riverstone, the flood protection and drainage facilities all performed as designed, protecting residents from potentially devastating floodwaters. Despite weather events far in excess of 100-year storm event criteria, there were no reported incidents of structural flooding within Riverstone.

You may have noticed that the water levels of many of the detention ponds were higher than usual during these events. These ponds are specifically designed to hold additional amounts of water when drainage to the Brazos River is limited due to flood conditions. Ultimately, these detention ponds release water into their designated outfall areas (Alcorn Bayou on the west side of Riverstone and Steep Bank Creek on the east side of Riverstone) as conditions improve. In addition, when detention pond levels are already elevated, short periods of heavy rain may also lead to temporary ponding within streets.

During the events, both LID 15 and LID 19’s operators worked around the clock to monitor the system and to ensure proper functioning. Although implementation was not needed during these events, both LID 15 and LID 19 kept ready supplies of emergency equipment such as Tiger Dams and DefenseSax.

Finally, as development in Riverstone continues, additional flood protection and drainage facilities will continue to be constructed. A second major pump station is being constructed in South Avalon with an estimated completion date of January 2017, and the final detention ponds within LID 15 will be constructed soon.
